DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kenneth D'Alessandro on October 29, 2004.

The application has been amended as follows:

a. Cancel the claims 22-37.

2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a plurality of storage pixel sensors disposed on a semiconductor substrate, each of the plurality of storage pixel sensors comprising: a photodiode, reset transistor, a source follower transistor, a capacitive storage node; and an exposure transistor having a source directly connected to the source of the source-follower transistor and a drain coupled to a global current-summing node, said exposure transistor having a control gate coupled to a saturation level control voltage, said exposure transistor and said source-follower transistor acting as a common source differential pair to divide said bias current between said source-follower transistor and said exposure transistor according to the relative values of integrated photo signal on said control gate of said source-follower transistor and said saturation level control voltage on said gate of said exposure transistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
